

Glad to hear the Predator sales are growing. I found your tool to be very effective and efficient in most all of the wells it was installed in. It improved the pump fillage and sometimes it even increased the production. It makes the tool economically and operationally justifiable.

Take care and hope sales continue to increase.

C.H., Retired
Production/Operations Eng.

“The ‘X12345’ had a Predator Gas separator installed in it about 2 weeks ago during a routine tubing leak repair. The pump card shown below taken this morning shows that the pump fillage is between 90 to 95%! The Cavins gas separator was only providing 70% pump fillage on this well with 1000 psi of pump intake pressure and the production appears to have increased from about 23 BOPD to 42 BOPD and the gas is way up from 150 to 475 MCFPD. This may be a flumping or surging well that the Predator is handling very well. The fluid level has been pulled down from 2700’ to about 1900’ of fluid above the pump and the well has quit cycling as much, so the unit is able to pump more fluid every day. The Predator gas separator is working GREAT!” Sr. Prod. Eng. T.B.

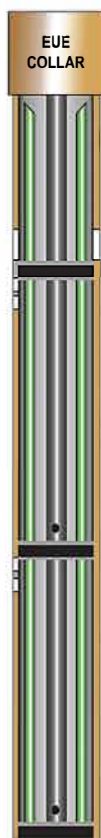

These (2) wells have the new 60’ Predator X-6 Separators. The ‘xx09’ was installed about 40 days ago and a Request has been made to speed up the SPM. “First time in our history”. The x02 has been in the hole for about 15 days and run time is climbing 2-4 points per day as fluid level comes down. C.M.

Down Hole Gas Separator

**30’, 60’, 90’,
120’ & 150”
LENGTHS**

- 2 3/8” X-3 standard
- 2 7/8” X-3 standard
- 3 1/2” X-3 standard
- 3 1/2” X-6H standard

- Designed for rod-pumped wells
- Well suited for high and low fluid levels
- Excellent for wells with high production of gas and oil
- Typically delivers >95% pump fillage
- Our Technology is based on multi-cylinder units that provide a multiplication of cross-sectional area to slow fluids below bubble rise velocity. In many cases we use as many as 40, 50, or 60 cylinders.
- This tool is designed for rod pump applications, it has specific features that allow the technology to work even in gas slugging wells.
- Manufactured 100% in the USA

The World’s 1st 100% Guaranteed Downhole Gas Separator
“Nothing Out-Performs a Predator”

Predator Tool is looking for companies who wish to increase their efficiency and increase their oil production. Our tool is proven, hands down, to be the best downhole separator in the oil & gas business. We stand behind our product with the ONLY guarantee in the industry.

Predator has tested, tried, and proven this new technology over the last four years. Research and development of this technology out-performs all currently known gas separators on the market.

The World’s first guaranteed downhole gas separator.

“Our separator will out-perform any other separator on the market! We give you a 30 day NO risk guarantee: if our separator doesn’t work - we don’t bill!”

“We are not in the business of giving away our tools!”

Predator Separators work in many types of applications including Shrouded ESP, PCP, and gas lift applications; we can custom build for these. Rod pumping is our specialty - We win every time!
